Bar Stirs & Cocktail Straws

OkStraw's Bar Stirs are ideal for use in drinks that are typically served in shallower, shorter glasses like low ball glasses, old fashioned glasses, rocks glasses, and whiskey sour glasses. Bar Stirs are also shorter in length, and 5mm, so they are more compact and lighter than OkStraw's other offerings.

Bar Stirs' slimmer and shorter dimensions make them light enough to use in martini glasses, where longer and heavier straws could more easily cause the drink to get knocked over. Bartenders are people entertaining company with mixed drinks, or are serving drinks from shorter glasses, should chose OkStraws Bar Stirs.

Jumbo Cocktail Straws

If you recently went out to get a drink to go, then chances are you were offered a jumbo cocktail straw. While their name sounds single purpose, Jumbo Cocktail straws are the most versatile, most widely used straws.

Jumbo cocktail straws are most suited to tall glasses and Collins glass, as well as 16 and 24 ounce to-go cups. Due to their 6mm width, jumbo cocktail straws are best used with water, soft drinks, juices, mixed drinks served in taller glasses, and iced coffee and tea. Due to their popularity, Jumbo Cocktail straws are available in a wide variety of colors, patterns, and motif designs.

Giant Straws

In most drinks, 6mm Jumbo Cocktail straws serve their purpose with ease. What happens, however, when drinks get thicker and more viscous?

That's where OkStraw's Giant Straws come in. With their 8mm width, Giant Straws are well suited to thicker drinks like fresh squeezed juices and smoothies. While wider in diameter, Giant Straws are still highly durable, and won't collapse under the pressure of heavier liquids. If you regularly prepare or serve smoothies or juices with high pulp concentration, then OkStraw Giant Straws are your go-to choice. Giant Long Straws are also useful for extra tall glasses, or larger capacity to-go drinks cups.

Straws Per Case	Packs/Case	Cases Per Pallet

Giant Long Straws

When tall drinks need tall straws; our Giant Long Straws are ready to help. With their 8mm width, giant long straws suck stronger for longer! These are perfect for thick, colorful drinks like fresh squeezed juices and smoothies. Show case your commitment to sustainability by giving customers a solid and super fun way to sip and snap pics of their drink!

Giant Long Straws are highly durable and won't collapse under the pressure of heavier liquids. If you regularly prepare or serve smoothies or juices with high pulp concentration, then OkStraw Giant Straws are your go-to choice. Giant Long Straws are also useful for extra tall glasses, or larger capacity to-go drinks cups.

Shake Straws

Giant Straws work a charm for smoothies and thicker beverages, but what happens when you face the very thickest and heaviest of shakes?

You go with OkStraw's 10mm Colossal paper straws, of course. Colossal straws are made for milkshakes, rootbeer floats and the heaviest smoothies with chunks of fruit. While some competitors' Colossal straws are made from cardboard or thinner paper that gives up the go, OkStraw's will hold up under the most viscous of drinks.

Get your customers taking photos of your premium beverages, by giving them a paper straw talking point to holler at in their posts.

Boba & Bubble Tea Straws

OkStraw's Boba paper straws are unique from other straws for a number of reasons. They are 12mm wide, allowing the large tapioca boba pearls to pass through them. They also have diagonally cut bottoms, so the straws can pierce through the plastic covers that many restaurants seal over the tops of their boba teas. Making paper straws strong enough to pierce the tops of boba teas is a challenge, but OkStraw's paper straws do it without breaking a sweat.

Some shops however may serve boba tea without plastic seals on their teas, and for those who do not need the cut tips, OkStraw also offers flat bottomed versions of our paper boba straws. With tough paper boba straws that suit any bubble tea, and come in a variety of colors and patterns, there is no better time than to ditch plastic, and make the OkStraw switch!
